

Positive Link Facebook Guidelines

Positive Link is a program of the Minnesota AIDS Project benefiting gay and bi men who are living with HIV through both social and educational programming.

We serve the HIV Community through our mission with a commitment to:

- * Present information people can rely upon, that is based on scientific fact, is impartial, and is informed by the experience of peers.
- * Provide peer-based emotional support in non-threatening and non-clinical environments.
- * Empower people to make health-promoting decisions to support each other and to serve as leaders in the fight against HIV and threats to their good health.
- * Build community by linking persons living with HIV to each other and by including them in planning and delivering our services.
- * Work to make change that promotes access to care, effective prevention, and fair treatment of persons living with HIV.

*** Positive Link Staff monitor postings and respond to inquiries during normal Minnesota AIDS Project operating hours. ***

Anyone using the Positive Link Facebook page to slander, defame or harass another program member will not only be removed from the page, but will also be reported to Facebook administration and risk losing their entire profile and membership to the Web site. This person will also no longer be welcome at Positive Link events.
